A look at advanced learners' use of mobile devices for
English language study: Insights from interview data
Mariusz Kruk
University of Zielona Gora, Poland

mkruk @ uz.zgora.pl

Abstract

The paper discusses the results of a study which explored advanced learners of English engagement with their mobile devices to develop learning experiences that meet their needs and goals as foreign language learners. The data were collected from 20 students by means of a semi-structured interview. The gathered data were subjected to qualitative and quantitative analysis. The results of the study demonstrated that, on the one hand, some subjects manifested heightened awareness relating to the advantageous role of mobile devices in their learning endeavors, their ability to reach for suitable tools and retrieve necessary information.
